

APPEALING TO ALBANIA

We hear your country is trying democracy
You're gonna love it 'cause it really works great
Unless you make a total mess of it all
Like our Albanians have done with our little state

They sound like children when they speak
And can't play nice when they're left alone
Subpoenas and indictments are what they know best
They all have skeletons to call their own

Chorus

*So, Albania, by the Adriatic Sea
We're appealing to your noble history
Please help our failing democracy
And send us a political party or three*

Send us some Communists-we'll give them a shot
They have to be better than anything we got
Give us some parties that claim to be new
We'll take your Social Democrats and the Anti-Socials too

How 'bout your Working Party...? Boy, could we use that
They'll be an improvement right off the bat
Our Albanians have really let things get out of hand
And then they tell us it's what the voters demand

Chorus

*So, Albania, by the Adriatic Sea
We're appealing to your noble history
Please help our failing democracy
And send us a political party or three*

Bridge

You know, Albania, we couldn't get you a role
When we had the gerbil, the weasel and the mole
But as they counted their money, they lost control
So now is the time to put you in their place
As their sludge has turned into toxic waste
And the time has come to clean out their space

Our Albanians scream about their public service
And how all their actions do the public good
But I'm not sure about all that public servant stuff
All I know is the servants have screwed the public good

Chorus

*So, Albania, by the Adriatic Sea
We're appealing to your noble history
Please help our failing democracy
And send us a political party or three*
