

CIRCUMSTANCES

You knew a few things about me
I knew nothing about you
We thought it was destiny
That first night
When every wild moment
Felt so right
But we never could break free
From the madness we had to get through

Chorus

*Circumstances first brought us together
Now circumstances are keeping us apart
We cannot come too close-can never go too far
We're being held by the pull of each other's heart*

We thought our timing would be great
Well at least that is what we said
Then luck would lead you out
When I came walking in
And fate would laugh at us
Time and time again
As you would glow beside your latest date
While I'd be getting kicked out of bed

Chorus

*Circumstances first brought us together
Now circumstances are keeping us apart
We cannot come too close-can never go too far
We're being held by the pulse of each other's heart*

Bridge

Luck, timing, destiny, fate
No matter what we call it
We never could catch a break
So we share the daily laughter
And we bury the hidden fears
Both sides of our lovin'
Spread across the years

Circumstances first gave us love
Then gave us all the feelings
We became so afraid of
We are left with the pain
Time will never erase
And the circumstances
Time can never replace

Chorus

*Circumstances first brought us together
Now circumstances are keeping us apart
We cannot come too close-can never go too far
We're being held by the throb of each other's heart
Oh! we're being held by the sobs of each other's heart*
