

LET'S COLLABORATE

The moon is cool
Yet so much cooler
Surrounded by stars
Venus is a beauty
And looks so lovely
Floating next to Mars
So let's join our gifts
And get together
Or we'll look like two lumps
In specimen jars

Chorus

*Apart we might be pretty good
But together we'll be great
Hey, we got worlds to create
So let us not hesitate
C'mon let's collaborate*

Bridge

We need each other
There's no denying
So I'll shine the sylls
To burn mystifying
You spark the thrills
To burst electrifying

No one can conquer
A soaring mountain
Covered by seas
And no one can worship
In a golden temple
Hidden by trees
So we better
Get our spirits out there
Or we'll be spanking ourselves
For being like both of these

Chorus

*Apart we might be pretty good
But together we'll be great
Hey, we got worlds to create
So let us not hesitate
C'mon let's collaborate*
