

## PRISM OF GOD

It is a long way from long ago  
A long way from what we did not know  
We assigned each of you a different name  
We designed each of you a different face  
All exist as one and the same  
All insist on their secret place

### *Chorus*

*As we start to perceive  
We begin to conceive  
We create what we need  
So we can believe*

We are livin' in the world we are in  
So must accept the gifts you are sharin'  
Bestow on us victory in war  
Bestow on us safety in law  
Bless this offering from our land  
Bless this beating heart in our hand  
Will you grant us release from desire...?  
Will you guide us with columns of fire...?

### *Chorus*

### Bridge

Springs to streams  
Streams to rivers  
Rivers to seas  
Seas to ocean  
Ocean as giver  
To all of these

You vowed to save us from all our terrors  
You have to cleanse us from all our errors  
Make the herds to graze and the rains to come  
Let us worship the darkest caves and the morning sun  
We pray to you that you must always deliver  
We pray to you that you remain our forgiver

### *Chorus*
