

PRISM OF LOVE

Chorus

The prism of love

Love's glory displayed

Every love's the same

Just in different ways

Your colors are wild

They dance all around me

They surround me like fire

And always astound me

The light shines from every face

Still comes from a single place

Colors warm and colors bright

All flow from the simple light

So many colors to see

Everlasting symphony

Chorus

The prism of love

Love's glory displayed

Every love's the same

Just in different ways

Your colors are soft

They throb like a rainbow

They caress me like silk

And make the world spin slow

The prism of love

It's how we are made

The prism of love

Your colors amaze

The prism of love

Our chance to get saved

Chorus

The prism of love

Love's glory displayed

Every love's the same

Just in different ways
