

YOU GOTTA GET THERE TO BE THERE

You're not going to ride
Any flying saucers
You can't rely on those
Proton transporters
Look for all the shortcuts you want
They don't exist
Look for all the handouts you wish
They won't assist

CHORUS

*You will find it's a lonely journey
Stepping over pieces of your heart
You may find that no one will care
So you must remember before you start
You gotta get there to be there*

You don't need stars shining
Through your eyes
You won't have to follow
Stars in the skies
Look at every sign and you won't read
About unexplored routes
Look all over and you won't see
The unknown greasy chutes

CHORUS

*You will find it's a lonely journey
Stepping over pieces of your heart
You may find that no one will care
So you must remember before you start
You gotta get there to be there*

Bridge

You are going to get lost
And the world will re-appear
As you have never seen it before
Make it become whatever you dare
Make it become so much more
'Cause just when you think you are done
The hardest steps have just begun
And you can't be there without getting there

You're not going to ride
Any flying saucers
You can't rely on those
Proton transporters
Look for all the shortcuts you want
They don't exist
Look for all the handouts you wish
They won't assist

CHORUS

*You will find it's a lonely journey
Stepping over pieces of your heart
You may find that no one will care
So you must remember before you start
You gotta get there to be there*
