

IT'S WHAT I GOT

I got a job at the local pain clinic
Where folks come in hurt and scared
We do our best to help them
'Cause it's way too tough out there

Chorus

*The money's not too bad
But the benefits ain't so hot
Hey it's not what I wanted
But it's what I got*

So I tried to get on "Drinking With The Stars"
Man, how I wanted to get hired
They said I looked like a natural
But my drinking left a lot to be desired

Chorus

*They kicked my butt off the show
Once I started doing shots
Hey it's not what I wanted
But it's what I got*

Bridge

I know this has been said before
I just keep looking all around
Always searching for something more
Don't stress too much about the path I found
I keep reaching out for all things new
And just figure I will make it through

Found myself with some of NY's Weirdest
Though they're really not my cup of tea
Now when folks start to talk of strange
They point their devices at me

Chorus

I have no idea

How I wound up in such a spot

Hey it's not what I wanted

But it's what I got

Got invited to a sit down with the local boys
It seems certain things weren't getting done
You know the boys will always use words
Until they get restless and reach for their guns

Chorus

I said, fellas, is there some other way

And they said: There is not

Hey it's not what I wanted

But it's what I got
