

COME WHAT MAY

Every time we hung out
It always felt like make-believe
We had mad times that would end as fairy tales
Except the mad time feeling would never leave

I just figured I was living a dumb dream
So I could not tell real from fake
But when you told me how you really felt
I knew my mad time feeling was no mistake

Chorus

*Love hit me like a new force
That changed my life
In every single way
I have fallen in love with you
I will be in love with you forever
Come what may*

You cried to me about your loves and flings
How all those flames just burned to ash
But deep down we both did believe
Only a soul-strong love is meant to last

Chorus

Bridge

Time no longer matters
There is no before...no after
There is no more night
There is no more day
Just this moment lasts forever
Come what may

Only us and only now
This instant alone is yours and mine
Love's pure beauty glows within our hearts
For the rest of our lives

Chorus
