

PRISM OF GOD

It is a long way from long ago
A long way from what we did not know
We assigned each of you a different name
We designed each of you a different face
All exist as one and the same
All insist on their secret place

Chorus

*As we learn to perceive
We begin to conceive
We create what we need
So we then can believe*

We are livin' in the world we are in
So must accept the gifts you are sharin'
Bestow on us victory in war
Bestow on us safety in law
Bless this offering from our land
Bless this beating heart in our hand
Will you grant us release from desire...?
Will you guide us with columns of fire...?

Chorus

Bridge

Springs to streams
Streams to rivers
Rivers to seas
Seas to ocean
Ocean as giver
To all of these

Make the herds to graze and the rains to come
Give us the darkest caves and the morning sun
You vowed to save us from all our terrors
You said you'd cleanse us from all our errors
We pray to you that you must always deliver
We pray to you that you remain our forgiver

Chorus
